Bio

Full-Stack Web Developer with a background in business operations and research, skilled in building scalable applications and projects. Driving solutions forward by merging technical skills with business experience.

Projects

Recipe Application | Python/ Django Web App
- Asked to produce a complete, modern recipe management system.
- Features user auth, favorites, search tool and data visualization.
- Produced a refined app featuring interactive, personalized functionality.

Meet | Serverless Event Web App
- Addressed request for event discovery mobile app with offline access.
- Built serverless PWA via React and integrated Google Calendar API.
- Delivered responsive, installable app with reliable offline functionality.

MovieMinded | Full-Stack Movie Database App
- Tasked with building a scalable app to manage users and movies.
- Created REST API with Node/MongoDB, frontend with React/Bootstrap.
- Deployed a full-feature app with authentication and favorites tracking.

Experience

CareerFoundry
Student | 2025 - Current
- Trained in hands-on development using an array of technologies.

Sales Strategist & Operations Analyst
Tebra Technologies | 2023 - 2024
- Identified gaps in revenue tracking and pipeline forecasting.
- Built dynamic Salesforce dashboards to deliver tailored, actionable insights across various teams.
- Partnered with leadership to align sales operations with strategic goals, driving more accurate projections.

Business Analyst
Independent Consultant | 2022 - 2023
- Addressed operational efficiencies in nonprofits and charities.
- Scoped challenges to implement scalable process advances.
- Collaborated with a range of teams to deliver scalable strategy.

Business & Program Development
Milken Institute | 2021 - 2022
- Faced with low event engagement following pandemic protocol, launched targeted outreach to drive participation.
- Produced historic engagement models to forecast YoY pacing.
- Achieved record-high attendance and successfully launched a new network to improve retention and deepen network insights.

Researcher & Data Analyst
Hermitage Partners | 2018 - 2021 and 2016 - 2017
- Tasked with supporting executive decision-making; compiled tailored market intelligence reports.
- Crafted tools and models from qualitative & quantitative data.
- Delivered research under tight deadlines to inform real impact.

Business Operations Analyst
Thomson Reuters (now LSEG) | 2017 - 2018
- Tracked employee feedback to identify operational strain from a pending merger and widely dispersed, 1,500-person team.
- Instated an engagement survey to route and resolve concerns.
